Our still and sparkling wines are preserved by the 'Le Verre de Vin' preservation unit. This specialised unit allows us to be confident that every glass of wine or champagne is served to you, fresh and in perfect condition every time.

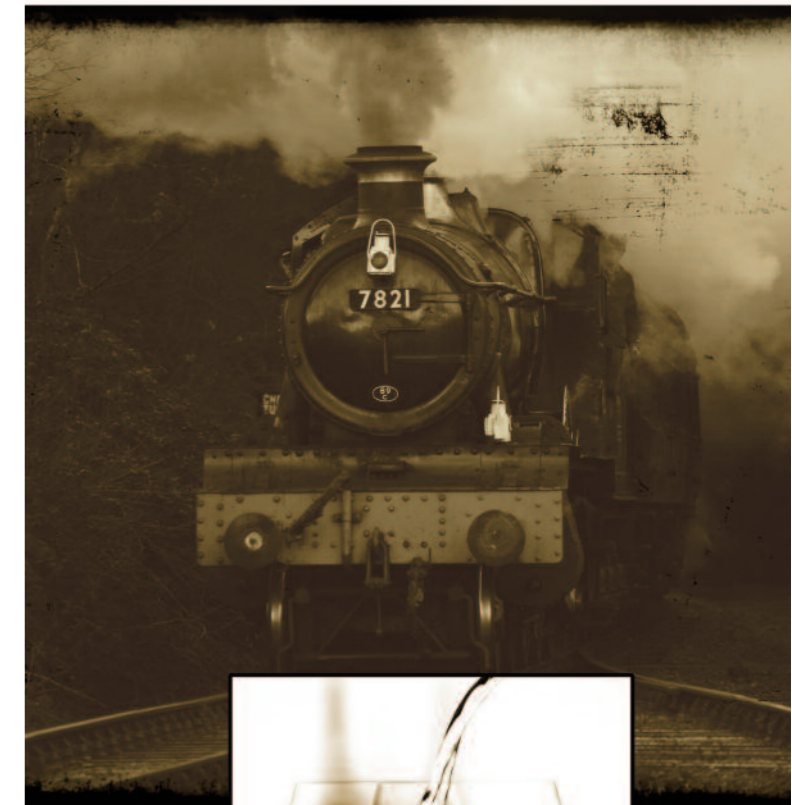

The still wine system uses a vacuum and seal to keep the wine from oxidising and keeping it totally fresh and true to its original character. For sparkling wine, a cap of CO2 gas is inserted into the bottle to make every reopening as fresh as the first.

Le Verre de Vin is a unique system used around the world in over 70 countries.
